WEBSITE CHANGES AND REVISION INSTRUCTIONS.

HOME – Loading Screen (Preloader)

When entering the Rectángulo website, an initial loading screen should be displayed (see attached reference).

Background: Rectángulo's signature red.

Central element: Rectángulo's White logo, perfectly centered.

Transition: Once loading is complete, the screen should smoothly fade out, revealing the homepage content.

HOME – Initial Layout and Scroll Navigation

When entering the homepage, the **Rectángulo logo should appear as the main visual element, occupying the full screen**, following the composition shown in the visual reference.

Initial layout:
- **Center:** Rectángulo logo as the main focal point.
- **Left side:** Social media links, following the reference layout.
- **Right side:** Navigation menu containing only Work, Projects, and About.

On scroll:
- The Rectángulo logo should smoothly scale down while remaining centered at the top.
- Social media links should remain on the left side.
- The Work – Projects – About navigation menu should remain on the right side.

Objective: Maintain a consistent visual structure with the logo centered, social media links on the left, and navigation on the right, creating a clean, balanced, and minimalist composition..

THIS IS THE CURRENT DESIGN, BUT WE'LL BE CHANGING

VISUAL REFERENCE: THE RED BOX HIGHLIGHTS THE NAVIGATION MENU AND SOCIAL MEDIA LINKS POSITIONED DIRECTLY BELOW THE LOGO.

REFERENCE LAYOUT SHOWING THE DESIRED ARRANGEMENT OF ELEMENTS, HIGHLIGHTED IN RED. YOU CAN SEE HOW THEY FUNCTION AND ARE ORGANIZED ON THE REFERENCE WEBSITE.

THIS IS THE CURRENT DESIGN, BUT WE'LL BE CHANGING

HOME – Featured Work

Below the main Hero video, add the Featured Work – Projects section, following the design and functionality of the reference website.

Design: Replicate the carousel's layout, proportions, and visual style.

Interaction (Hover): Automatically play a video preview when hovering over each project.

Navigation: Maintain the transitions and interactive behavior shown in the reference.

Optimization: Ensure smooth video playback without affecting website performance.

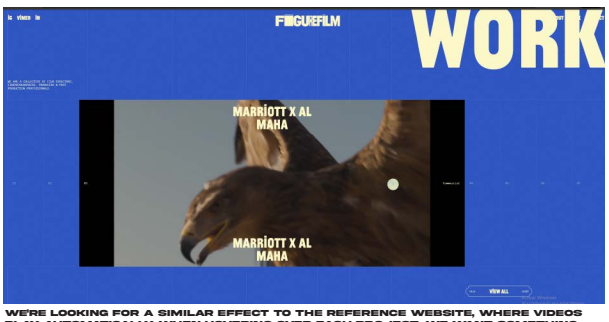

Note: Since you previously mentioned this feature might involve an additional cost, could you please provide a separate quote? We want the visual design and functionality to match the reference as closely as possible.

THIS IS THE CURRENT DESIGN, BUT WE'LL BE CHANGING

Reference example of the desired result.

WE'RE LOOKING FOR A SIMILAR EFFECT TO THE REFERENCE WEBSITE, WHERE VIDEOS PLAY AUTOMATICALLY WHEN HOVERING OVER EACH PROJECT. WE WANT SOMETHING SIMILAR, BUT NOT IDENTICAL. YOU CAN REVIEW HOW IT WORKS ON THE REFERENCE WEBSITE.

GENERAL – Cinematic Grain Texture

Adjust the background texture throughout the website to achieve a **more visible and defined cinematic grain**, based on the visual reference.

- **Application:** Across the backgrounds of all website sections.
- **Texture:** Fine, organic, and even grain, avoiding a digital-noise look or an overly heavy film effect.
- **Main Hero Video:** Remove any grain or noise effect and preserve its original appearance, without altering its quality, color, or playback.

REFERENCE EXAMPLE OF THE GRAIN TEXTURE I'M REFERRING TO.

GENERAL – Color Scheme Adjustment

Update the website's current color scheme while maintaining Rectángulo's visual identity.

- **Background:** Rectángulo's signature red.
- **Typography:** Headings, subheadings, and body text in white or black, depending on contrast and composition.
- **Graphic Elements:** Adapt icons and navigation elements to white or black.
- **Texture:** Preserve the cinematic grain texture over the red background.

GENERAL – Typography Design and Visual Identity

Incorporate graphic elements from **Rectángulo's logo typography** into the website's main headings.

- **Reference:** Use the logo's distinctive elongated horizontal strokes and geometric letterforms, particularly the letter **E**.
- **Application:** Integrate these elements into featured headings, such as ***"Let's Collaborate"**, customizing selected letters to create unique typographic compositions.
- **Important:** Maintain readability and visual balance, applying these treatments selectively rather than throughout all text.

Objective: Develop a distinctive typographic language that connects the headings with the logo and reinforces Rectángulo's visual identity across the website.

GENERAL – Logo Update

On the **Work page and all other website sections**, replace the abbreviated **REC** logo with the full **RECTÁNGULO** primary logo.

The abbreviated **REC** logo (three letters) should only be used in the **Footer**, maintaining a balanced composition consistent with the website's visual identity.

REPLACE THE ABBREVIATED THREE-LETTER REC LOGO WITH THE FULL RECTÁNGULO LOGO.

ABOUT – Services Integration

Merge the **About and Services** sections into a single page, preserving the content and visual elements of both.

- **Integration:** Incorporate Services into the About page.
- **Navigation:** Remove Services as a standalone page and from the main navigation menu.
- **Design:** Maintain a cohesive visual structure while preserving the identity and design of both sections.

ABOUT – Opening Image

Update the **About** page by adding a large-format opening image, following the visual composition of the reference website.

- **Image:** Use a large-format image as the main visual element.
- **Text:** Move the existing **"No Geographic Limits"** content below the image.
- **Design:** Preserve the current style and information while maintaining a cohesive visual layout.

THIS IS THE CURRENT DESIGN, BUT WE'LL BE CHANGING

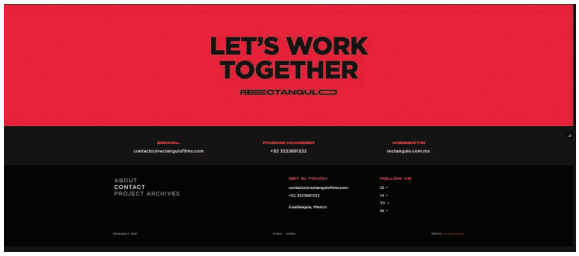

Reference example of the desired result.

FOOTER – Contact Integration

Integrate all existing **Contact** information into the Footer, removing Contact as a standalone page.

- **Let's Work Together:** Keep this phrase as the main focal point of the Footer.
- **Contact Information:** Preserve and organize all existing contact details within the Footer.
- **Navigation:** Remove Contact from the main navigation menu.
- **Design:** Maintain a clean, balanced layout consistent with Rectángulo's visual identity.

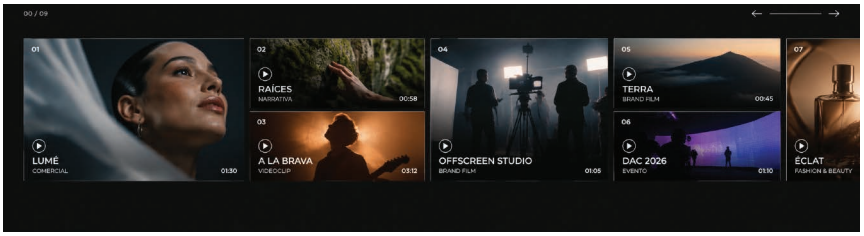

WORK – Project Layout

Keep the existing horizontal scrolling, alternating between single-video blocks and vertically stacked two-video blocks, following the visual reference.

Layout: Combine single-video blocks with blocks split into two stacked videos.

Navigation: Preserve the current horizontal scrolling functionality.

Objective: Optimize space, showcase more projects, and create a more dynamic and balanced visual composition.

REFERENCE EXAMPLE OF THE DESIRED RESULT.
