RECTANGULO

WEBSITE STRUCTURE & CREATIVE REFERENCES — HOME

00 - HOME

HOME structure and interaction brief. Figure Film is used exclusively as a functional reference for this page. The goal is to communicate behavior, pacing, hierarchy and user experience — not to reproduce its visual identity.

01 - UPDATED USER FLOW

HOME should work as a progressive experience: first introducing the brand and its audiovisual work, then revealing navigation and context, and finally leading the user toward featured work and contact.

INTRO	HERO 01	HERO 02	HERO 03	EXPLORE	FEATURED WORK	VIEW ALL	CTA / FOOTER
Animated logo	Demoreel + logo	Logo scales down + menu	Statement + View Showreel	Work / Services / Projects	01–05 + category + hover	Full portfolio	Contact + legal

CONTENT LOGIC

WORK = portfolio of completed client/collaboration work. **SERVICES** = services and capabilities available to clients. **PROJECTS** = Rectángulo-owned creative projects, including series, films and original IP such as Aahh! La Brava.

02 - INTRO / WEBSITE ENTRY

PURPOSE

Create a short branded entry before revealing HOME.

CONTENT

Rectángulo logo on a clean/dark background with a short logo animation. Once the animation finishes, a simple interaction allows the user to enter the website.

REFERENCE

The reference is useful for the strong focus on the logo, negative space and the feeling of entering an audiovisual experience.

03 - HERO / DEMOREEL + VIEW SHOWREEL

A short excerpt from the Rectángulo demoreel fills the viewport and evolves through approximately three scroll states. The user's scroll should drive the scale and position of the logo and the appearance of navigation, social links and copy.

STATE 01	Demoreel excerpt + dominant Rectángulo logo.
STATE 02	As the user scrolls, the logo scales down and becomes part of the navigation. Menu and social links appear: IG / YT / VI / IN.
STATE 03	The main brand statement appears: a short description explaining what Rectángulo is.
VIEW SHOWREEL	Include an explicit action to open and play the full demoreel. The hero video can remain a shorter optimized excerpt, while this CTA provides access to the complete piece.

04 - EXPLORE / WORK - SERVICES - PROJECTS

After the hero, HOME transitions into its main content area. Use a solid background with a subtle grain/noise texture. The three concepts act as primary navigation paths and can use oversized typography as a major compositional element.

WORK leads to the full portfolio. **SERVICES** presents Rectángulo's client-facing capabilities. **PROJECTS** contains original developments such as Aahh! La Brava, series, films and future creative properties.

05 - FEATURED WORK / NUMBERING + CATEGORY

HOME should contain only a curated selection of featured work. Each entry should provide enough information to feel editorial without overcrowding the page.

01	PROJECT NAME	COMMERCIAL
02	PROJECT NAME	BRANDED CONTENT
03	PROJECT NAME	FILM / NARRATIVE
04	PROJECT NAME	LIVE / EVENTS
05	PROJECT NAME	MUSIC / CONTENT

Numbering (01 / 02 / 03...) and category should become part of the visual information system. This does not mean reproducing the reference layout; the purpose is to provide order, editorial character and immediate context.

06 - HOVER PREVIEW + VIEW ALL WORK

When the cursor hovers over a featured project, a temporary visual preview should appear. This can be a short video, loop or moving image. Moving to another project changes the preview; clicking opens the Project Viewer.

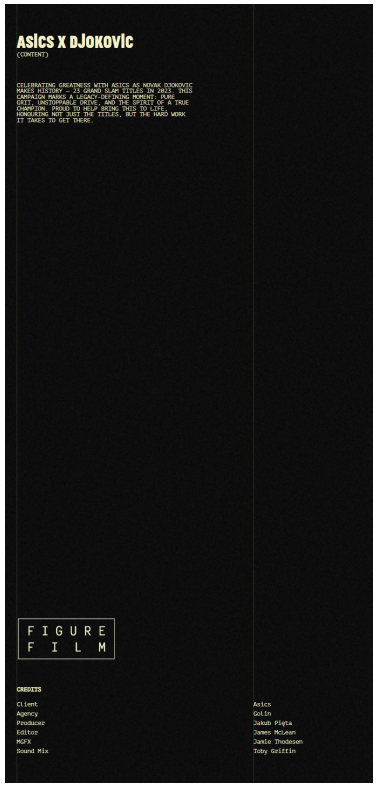

VIEW ALL WORK →

After Featured Work, provide a clear action leading to **WORK**, where the broader portfolio lives. HOME should not attempt to display every completed project.

07 - PROJECT VIEWER / POP-UP

Clicking a project should open a large overlay/modal without losing the user's current position on HOME.

VIDEO	Full video player with standard controls, volume and fullscreen.
PROJECT INFO	Project name, client, category, year and short description.
CREDITS	Director, production company, agency, DOP, producer, editor, color, sound design/mix and additional fields as required by each project.
CLOSE	Close the viewer and return the user to the exact position on HOME from which it was opened.

08 - CTA / CONTACT + FOOTER

The closing section should invite the user to start a conversation with Rectángulo before presenting contact and legal information.

CTA	Explore language such as **LET'S COLLABORATE**, **LET'S WORK TOGETHER** or **START A PROJECT**. Final wording will be defined according to Rectángulo's brand voice.
CONTACT	Include a short contextual invitation followed by the selected email address and other contact channels.
SOCIAL	Instagram, Vimeo, YouTube and LinkedIn; where appropriate, keep the abbreviated system IG / VI / YT / IN.
LEGAL	Privacy Notice, cookie policy if required, copyright, year and other necessary legal information.

09 - HOME / FINAL SPECIFICATION

INTRO	Animated logo + website entry.
HERO 01	Demoreel excerpt + dominant logo.
HERO 02	Logo scales down + menu + social links.
HERO 03	Main statement + VIEW SHOWREEL.
EXPLORE	Work / Services / Projects.
FEATURED WORK	Curated selection with numbering 01–05, project name and category.
INTERACTION	Hover = preview / Click = Project Viewer.
VIEW ALL WORK	Explicit access to the full portfolio.
PROJECT VIEWER	Video + project information + credits.
CTA	Contextual invitation to collaborate.
FOOTER	Contact + social + legal.

REFERENCE NOTE

For HOME, Figure Film is used only as a reference for behavior, navigation, pacing, Featured Work treatment and project presentation. Other Rectángulo pages will be defined separately using their own references.
